DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 20-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 20, in line 8, there is no antecedent basis for "said primary area," in line 10, there is no antecedent basis for "said posterior area." More importantly, applicant defines an insulating adhesive film and a board holding device. It seems the structure of the insulating adhesive film to create the board holding device and may remove/insert the expansion board. Applicant should clarify the specific relationship between the insulating adhesive film and the board holding device. Examiner interprets the claim to be a board holding device because it appears that the integral protruding lip would serve the same purpose of the board holding device.

Allowable Subject Matter

3. Claim 20 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: The cited references fail to teach the claimed invention, Begis discloses a motherboard having a circuit side, a plurality of integrated chip packages mounted thereon and at least one accepting device/connector to provide an insertion/removal expansion board. Elias discloses an insulating adhesive film covering a surface of a printed circuit board for providing a means to pull the printed circuit board from an accepting device by a user's hand. Elias fails to teach the specific limitation of the insulating film being wound around the printed circuit board as in the claimed invention, for example, the insulating film wound and adhered around the expansion board forming an integral protruding lip with a fixed end and a free end. There is no suggestion to modify the cited references to disclose the claimed invention.

5. Claims 21-28 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
